## **Project Description**

## Principal's Priority

1

Inlet View's unique downtown location offers numerous opportunities for off campus activities; however, the safety and health of students is critical. Regular exercise increases mental and physical well-being while helping promote increased academic achievement for students. In order for students to get to nearby running tracks, students have to leave school grounds and cross traffic areas requiring additional parent volunteer supervision and not allowing for safe organized recess running/walking activities, Physical Education classes, regular academic enrichment, or "teach to the moment lessons".

#### **Benefits if Project is Funded**

Healthier students and staff population. Students and teachers can participate in regular healthy lifestyle activities on school grounds.

# Impacts if Project is not Funded

Students have fewer opportunities for less track activities on school grounds. Staff has to pre-plan track activities off school grounds requiring additional parent volunteers for students' safety.

# of Students impacted by project 210

Project has prior state funding available

Project Start Year 2011

Project Finish Year 2012

Project has matching funds are available No

Project has federal funding available No

Project has has a public review process Yes Capital Request Advisory Committee

No
